

Recognia Options Ideas®

Actionable Ideas for your Options Traders

Recognia Options Ideas takes world leading technical analysis and backtested strategies, and applies it to options trading. This enables you to give your account-holders options trade ideas based on an underlying equity, combined with proprietary profit and loss calculations, to surface the best options strategies.

Give Equity Traders the Confidence to Trade Options
Options Ideas helps equity traders bridge the gap between learning options strategies and applying them in the real-world. The chart associated with the options idea is annotated to show where the price may be headed, and how much profit the options trade idea could generate if it

were to reach that target. This helps the trader better understand the relationship between the stock and the options outcome. Real-world trade opportunities, complete with transparent calculations, gives the trader confidence to employ options strategies to enhance their existing portfolios.

My Preferences ▼

What sectors and research styles do you prefer?
We will try to show you ideas that match at least one of these—the more the better.

Customization Gives Account-Holders Tailored Trade Ideas

With the ability to customize by choosing filtering and sorting preferences, account-holders are presented with tailored options ideas and strategies that are most relevant to them and their trading style. A variety of categories such as options strategies, sectors, as well as technical & fundamental analysis, help refine the daily Options Ideas.

Seamless Integration with other Recognia Products

Clients already offering Recognia Technical Insight™ to their account-holders will enjoy seamless integration of Options Ideas. Account-holders will be able to easily transition between Technical Insight Featured Ideas, to Options Ideas, via the dropdown menu at the top of the interface, providing a seamless client experience.

FEATURE	BENEFIT
Recognia Score	Recognia Score factors in profit, loss, cost, and liquidity to help surface the most useful ideas and provide a quality ranking (AAA being the highest and C the lowest) determined by a proprietary Recognia formula which is transparently explained to the end user, as to why it was assigned.
Profit & Loss	In addition to outlining the target profit and the maximum loss, the options diagram maps out the strategy's profit and loss scenarios with educational tooltips to help investors evaluate the risk/reward trade-offs of the specific trade idea.
Calculations	In the strategy description box to the right of the chart, account-holders can click the calculator icon to see a breakdown of the key values that make up the strategy and precisely how they were calculated, including: net cost or net credit, max loss, max profit, and target profit.

ABOUT RECOGNIA

Recognia is the worldwide leader in quantitative and technical analysis. Our actionable technical, fundamental and value-based analytics help retail online brokers to monetize their investor accounts and institutional professionals to optimize their trading strategies. Recognia research helps validate investment decisions, manage risk and find trade ideas. It provides coverage on more than 85 exchanges worldwide including stocks, options, ETF's, forex, indices, and futures. With more than 20 million provisioned accounts, Recognia products service the largest and most successful firms and institutions worldwide including: Bloomberg, Fidelity, Charles Schwab, Merrill Edge (Bank of America), Kotak Securities, TD, Scottrade, NCB Capital to name a few.
